

MINE RECLAMATION

1. GENERAL

1.1 TITLE:: MINE RECLAMATION

1.2 *COURSE NUMBER (if known):: DC.MN 413

1.3 CREDITS:: 9, (L-T-P: 3-0-0)

1.4 SEMESTER-OFFERED:: VII Semester

1.5 PRE-REQUISITES:: None

1.6 COURSE COMMITTEE MEMBERS ::

2. OBJECTIVES::

The objective of the paper is to provide fundamental of land use planning and reclamation in around the mine.

The issues related with land reclamation on different types of waste rock will also be addressed.

3. COURSE TOPICS::

LAND USE PLANNING

Objective and importance land use and capability classification system land use planning models and their limitations in Mining.

Impact of Mining activities on land characteristics and land use planning.

Impact of Mining on soil erosion and sedimentation and control measures.

Land reclamation Principles and requirement, removal, storage and replacement of top soil and sub soil on reclaimed lands.

Bonding requirements for eco-restoration activities physical, chemical and Biological methods of land reclamation.

Planning for Biodiversity on reclaimed land, port project land use Monitoring restoration equipments, scheduling and cost.

Green Belt Development Plan.

Technique for monitoring and assessment of reclamation plantation afforestation.

4. READINGS

4.1 TEXTBOOKS::

4.2 *REFERENCE BOOKS::

1. Analysis of land use change: Theoretical and Modelling approaches, 2011 Helen Briassoulis, Greece, Ebook.
