

Course code: PH331

Course Name: General Pharmacotherapeutics

Pre-requisite: General Pharmacology

Objective of the course:

The main objective of this course is to provide ground structure of basic principles and topics of pharmacotherapeutics, and to facilitate study of the use of drugs as therapeutic agents, their administration, pharmacokinetics, effectiveness, their side effects and toxicity. The learning objective of this subject is to also explain the rational use of therapeutic agent according to proposed therapeutic indications.

Course Content:

Study of pharmacological actions, mechanism of actions, adverse drug reactions, interactions and applications of following:

Unit I: Cardiovascular System (13 Lectures)

Digitalis and cardiac glycosides, Anti-hypertensive drugs, Antianginal drugs, Antiarrhythmic drugs, Drugs used in atherosclerosis drugs.

Unit II. Hemopoietic system (7 Lectures)

Hematinics and growth hormones, Anticoagulants, Vitamin K and Hemostatic agents, Fibrinolytic and anti-platelet drugs, Blood and plasma volume expanders.

Unit III. Respiratory system (7 Lectures)

Anti-asthmatic drugs including bronchodilators and mucolytics, Anti-tussive and expectorants, Respiratory stimulants.

Unit IV. Urinary system (6 Lectures)

Fluid and electrolyte balance restorers, Diuretics and antidiuretics.

Unit V. Gastrointestinal disorders (6 Lectures)

Antacids, anti-secretory and anti-ulcer drugs, Laxatives and antidiarrhoeal drugs, Appetite stimulants and suppressants, Emetics and anti-emetics.
